- Maintains composure and persistence when facing setback and challenges.

PROFILE

An aspiring BS Computer Science student at the University of Cebu Main with strong academic achievement and foundation in programming, artificial intelligence, and software development. Eager to apply the knowledge that I learned to a real-world application through a practicum opportunity, I bring hands-on experience in coding, debugging, and collaborating on team projects. I am committed in enhancing my skills while contributing to meaningful projects that align with my passion for technology
